TRAINING EXPERIENCE

FULL STACK WEB DEVELOPER TRAINEE

AlmaBetter | Bangalore(remote)

JUL 2022 - FEB 2023

- Experienced in front-end and back-end programming languages and tools, including **Node.js** and **MongoDB** databases.
- Developed and optimized web applications using **React** and **Express** frameworks.
- Knowledgeable in best practices such as **user authentication** and **data encryption** for secure web application development and **deployment**.
- Ranked among the top 5% of a 200-student cohort.

PROJECTS

SNITCH - ECOMMERCE APP

FEB 2023 - APR 2023

Tags : MERN, Context API, SEO, React-helmet, payment-gateway

[DEMO](#) | [GITHUB](#)

- Implemented **JWT** and **Bcrypt.js** package for secure user authentication and authorization.
- Protected routes for user and admin panel using **react-router-dom**.
- Built a **custom hook** for reusable products category code.
- Utilized **local storage** to efficiently store and manage cart items, promoting a seamless user experience.
- Integrated **Braintree payment gateway** to enable customers to shop at their fingertips.

CRYPTOCURRENCY DASHBOARD

NOV 2022 - DEC 2022

Tags : Redux.js, Context API, Pagination, Responsive UI/UX

[ALMABETTER VERIFIED PROJECT](#)

[DEMO](#) | [GITHUB](#)

- Created a **responsive dashboard** using React, Redux, and **Tailwind CSS** to provide an intuitive user interface.
- Implemented sidebar **pagination** for a seamless user experience.
- Utilized **ChartJs** and **CoinGecko API** to provide real-time updates of 200+ crypto-currency prices with graphical representation.
- Designed an exchange rate conversion tool.

GET YOUTUBE SUBSCRIBERS

DEC 2022 - JAN 2023

Tags : REST API, NodeJs, CRUD, MongoDB

[ALMABETTER VERIFIED PROJECT](#)

[DEMO](#) | [GITHUB](#)

- Developed a **REST API** app using **Node.js** and **MongoDB**.
- Implemented **CRUD** operations for efficient data management.
- Robust **error handling** and **validation** techniques were implemented to enhance application security and ensure data integrity.
- Tested the **API** thoroughly using **Mocha** and **Chai** to ensure the reliability and functionality of the **endpoints**.
